

7.4.4 WITH SRT 4102

Given here is an illustration of how products in the SRT 4000 speaker range can be used for immersive surround sound in 7.4.4 format. The SRT are high performance active speakers and are meant to bring a larger than life cinematic experience to large rooms.

Today’s streaming services are bringing high quality audio and video to your home. This stream contains high definition audio, wherein the immersive format, Atmos, is growing fast.

To recreate the Atmos sound in your home, it is advisable to dedicate a specially made AV room, which has a large screen and a multichannel sound system. This sound system has dedicated processors, amplifiers, speakers and requires a trained professional to install and calibrate it.

Sonodyne with over 4 decades of audio engineering experience, understands this specialised needs and brings to you the SRT series of custom home theatre products. These products are designed on our studio products’ platform and have the following features:

- Slim, dual aluminium-wood rigid enclosure for speakers
- Kevlar woofers for detailed mid and low frequency response
- Dome tweeters in custom waveguide for linear off axis response
- Dedicated multichannel amplifiers with EQ

There is no better way to relive the cinema experience at home than a custom home theatre from Sonodyne.
