

# SIC SERIES

# SONODYNE®

The SIC Residential Series features high performance ceiling speakers for home theatre and channel music applications. All models in the range are two way designs with an elaborate crossover for critical midrange detailing. In the 3360 and 3380, the moulded plastic enclosure has a unique waveguide rendering appreciable SPL without loss in low frequency. The angled transducers of the 3460 result in excellent off-axis response for higher intelligibility at the listening position. Compact, powerful and elegantly finished with a magnetic grill, the new SIC Series blends into your ceiling and reproduces music and movie content efficiently.
